4HS MultiPower pumps (4HS MP), powered by renewable energy sources, is a new range coming from the 4HS pumps with built-in inverter.

4HS MultiPower pumps may be powered by AC or DC with a wide range of operating voltage (90 - 265 VAC / 90 - 340 VDC).

This means that 4HS MP pumps can be connected to solar panels, batteries, wind turbine and diesel generator.

A special software algorithm allows for adjusting the hydraulic performance to each source and to the available power while maximizing the pumped water.
